GET SECURED

BY INVESTING IN A COMPREHENSIVE ONLINE BACKUP SOLUTION

MX-IT Solutions
We get IT done

AN ONLINE BACKUP SOLUTION FROM MX-IT SOLUTIONS IS COMPLETE, UNIFIED AND COST EFFECTIVE.

Hosted backup servers means that your data is always safe from theft, damage or loss

Real-Time ransomware protection means that your data is always protected

Create backups faster than you can say "data" with superior hardware and local servers

ADVANCED FEATURES TO TAKE YOUR BUSINESS TO THE NEXT LEVEL OF DATA SECURITY

COMPLETE DATA RESTORATION

When a PC or laptop fails and suddenly stops working, it usually means that all is lost. But with a backup solution from MX-IT Solutions, that scenario is something of the past. We can provide replacement hardware and run a complete restore of the entire lost machine, meaning that no data, software or licenses are lost.

PER FILE, FOLDER, DRIVE OR COMPLETE PC BACKUP

Backups can be set to run on a specific file, folder or drive. We can also backup an entire PC state. This means that even if hardware is lost, stolen or destroyed, your files are only a few clicks away.

INITIAL SEEDING

Too much data to upload? We will help you load all the initial data on an external media device and have it uploaded to our servers manually. This way your data and bandwidth is spared.

ENCRYPTION

The key is in your hands. Before your data even leaves your premises, it's encrypted using the highest standards. Your data would be useless to anybody who managed to come across it - on-site or in the cloud. Encryption of your data also takes your business one step closer to POPI act compliance.

MX-IT Solutions
We get IT done

BACKUP SOLUTIONS TO FIT ALL YOUR COMPANY REQUIREMENTS

Our backup solutions support SQL, Active Directory, VM Ware, and much, much more

Backed up data can be restored to its original location or to any other location

Restore an entire machine back to its last backed up state in one go

ADVANCED FEATURES TO TAKE YOUR BUSINESS TO THE NEXT LEVEL OF DATA SECURITY

CROSS PLATFORM COMPATIBILITY

Protect every component of your IT infrastructure - Physical and Virtual. Windows® and Linux® Servers, Windows®, Mac®, Linux® Desktop and Laptop PC's, iPhones, iPads, Android Devices as well as Office 365 Mailboxes

APPLICATION PLUG-INS

Backup and recovery of Microsoft® Exchange, SQL Server®, Active Directory® and Office 365 mailbox data is a total breeze with free plug-ins. Also included is VMWare, Hyper-V, XenServer agentless backup agents.

BARE METAL RECOVERY

Restore your entire machine in one go. Our bootable media allows for recovery of your machine just as it was at the time of your last backup.

RESTORE YOUR FILES FAST

Download your files from any internet-connected computer, anywhere in the world. Continue working on that lost document or even restore an entire system back to its last complete backup.

VIRTUAL SERVERS (VPS)

Are you sure your hosting company is backing up your server data? Fancy RAID arrays are no replacement for backups. Remotely backup your virtual private server to our cloud for less worry and easy migration.
