A PHONE SYSTEM FROM MX-IT SOLUTIONS IS A COMPLETE, UNIFIED AND COST EFFECTIVE COMMUNICATIONS SOLUTION

A hosted PBX system means that your phone system remains online, no matter what

Our telecom system can be set up to run on many physical devices from a desk phone to android/iOS

Place and receive calls directly on your PC or Mac via softphone

REDUCE YOUR COSTS, INCREASE YOUR PRODUCTIVITY & MOBILITY WITH A PHONE SYSTEM FROM MX-IT SOLUTIONS

Move to a VoIP phone system from MX-IT Solutions - an IP PBX that provides superior features and flexibility at a far lower cost.

- Evolve your communications by allowing call transfers to any phone in any office, even if it's in different countries.
- using a sip application on a mobile phone will allow employees to take their extension with them wherever they go.
- Lower your call costs and globalize your business by being able to call all your offices for free.

An MX-IT Phone system completely replaces a hardware PABX. It supports popular SIP phones, and requires that your office only be online.

5 Advantages of using a VoIP phone system

1. Hosted PBX: Always online and secure
2. Inexpensive to rent and expand
3. Work from anywhere with iOS & Android clients
5. Save on your phone bill
9. Standards based – use popular IP Phones

SAY GOODBYE TO EXPENSIVE EXPANSION MODULES AND COSTLY PHONE BILLS!

Save on costs by
placing inter-office
calls for free

Advanced call features
at no additional cost

Employees abroad
can place internal
office calls free of
charge

SAVE ON COSTS WITH MX-IT SOLUTIONS

A hosted PBX phone system is much cheaper than a traditional phone system. The initial purchase cost and the expansion cost are both much lower compared to a proprietary PABX, and with an MX-IT Solutions Phone System you also save on maintenance fees.

Unlike appliances, an MX-IT Solutions Hosted PBX can scale to an almost unlimited capacity because it leverages modern server hardware.

With an MX-IT Solutions hosted PBX phone system, businesses can save on international office calls because every phone is connected to one central hosted PBX.

Integration of remote workers is easy with a sip application installed on a mobile phone and connected to the hosted PBX phone system, boosting mobility and resulting in savings from teleworking possibilities.

An MX-IT Solutions hosted PBX Phone System includes enterprise-level features as standard. Businesses do not need to pay extra for advanced features or add-ons, features include: digital receptionist, integrated voice mail, speed dialing and more.
